Election/Restrictions

Applicant's election with traverse of Species I, figures 1-2, (e.g. claims 1-10 and 12-15) in the reply filed on 5/28/10 is acknowledged. The traversal is on the ground(s) that the function of the spacer elements of all species is the same. This is found persuasive. Thus, claims 1-15 will be examined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-9, 11, and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1369516 A1.

EP '516 teaches a method of using the apparatus, as shown in figures 1-8 and the specification. EP '516 discloses a device (abstract) for winding knitted nets 16 produced from thrums 20 and wefts 18 to a given width at a winding point in which spacer elements (22, 24, 26, i.e., round pieces shaped in form as ribs) are arranged ahead of the winding point along which the thrums of the knitted net are guided, see figures 1-8 and the specification.

It has been held that the recitation that an element "can be" performing a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6-7, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1369516 A1, in view of Kohl, U.S. Patent No. 3646782.

EP '516 discloses the claimed invention except for moving the spacer or rotating the spacer.

Kohl '782 discloses the concept of moving the spacers 3 connected by a common electric motor which rotates the shaft.

EP '516 recognizes that other modifications may be used to adjust the width of net.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the apparatus of EP '516 by providing the movement of spacers as taught by Kohl '782, and use any old and well known shaped (e.g. rotation of the rod) for movement of the spacer as another way of oscillating the spacer.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SANG KIM whose telephone number is 571-272-6947.

Application/Control Number: 10/590,154 Page 4

Art Unit: 3654

The examiner can normally be reached Monday through Thursday from 9:00 A.M. to 5:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Nguyen, can be reached on (571) 272-6952. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
